Global Superstore | *Insights & Recommendations*

Profit by Discount Band

Bottom 10 Countries by Profit

Three risks

1. Discounts over 30% lost about $793K, roughly 54% of net profit.
2. Tables lose $64K; 29 of 147 countries are unprofitable (Turkey -$98K, Nigeria -$81K).
3. Profit growth slowed from 32% (2013) to 24% (2014) and margin dipped to 11.73%.

Three opportunities

1. Recovering half the $793K lost on 30%+ discounts would add about $0.4M (assumes volume holds).
2. Grow top-profit lines: Copiers ($259K) and Phones ($217K), plus high-margin Paper and Labels.
3. Canada has a 26.6% margin on only $67K of sales, so it's worth testing for growth.

Five key insights

1. Sales up 90% since 2011 ($2.26M to $4.30M), but margin stuck at 11 to 12%.
2. Technology earns 45% of profit; Furniture is 33% of sales but 19% of profit.
3. 24.5% of order lines lose money, with an average discount of 45%.
4. APAC leads profit ($436K); EMEA earns only 5.45% margin on $806K sales.
5. November and December generate about 25% of annual sales.

Five recommendations

1. Cap or require approval for any discount above 30%.
2. Reprice Tables and lift Furniture's 6.9% margin.
3. Review loss-making countries: Turkey, Nigeria, Netherlands, Honduras, Pakistan.
4. Prioritize Technology and high-margin lines (Copiers, Phones, Paper, Labels).
5. Fix EMEA margin, test growth in Canada, and stock up for Nov to Dec.
